PRIME CONVERTIBLE
Frost Free Bottom Mounted Refrigerator Range

PRIME CONVERTIBLE

SAVES TIME FOR HAPPIER TIMES

Introducing Prime Fresh with 4 time-saving modes. Whether you need to quickly defrost or marinate, pre-cook and store your meals or enjoy ultra-chilled beverages, these convertible modes not just compliment your cooking but also save your time.

Refrigerator FF Series

Intelligent AI

OPTIMUM COOLING & MAXIMUM POWER SAVINGS
WITH INTELLIGENT **ECONAVI** SENSORS

Experience more freshness than ever!

Prime Fresh Freezing freezes food lightly at approx. -3°C . Food frozen in this way can be stored for a longer period, and it retains freshness and taste better than when stored in a regular fridge. Defrosting isn't needed for lightly frozen items, so there's minimal loss of texture and nutrients, and it saves you time. It's suitable for a variety of foods that need to be cooked soon, or meat and fish.

* At the time of purchase, the refrigerator is in the Chilled mode. To use Prime Fresh Freezing, please switch the setting

Two-layer vegetable case

Using both the upper and lower vegetable cases lets you store a lot of vegetables and fruits. You can use the upper case for soft delicate vegetables such as tomatoes and the lower case for large or leafy vegetables. Separating items in this way enables neat and organized storage.

Refrigerator FF Convertible Series

WASHING MACHINE

Get a gentle yet speedy wash with a 5-star rated fully automatic front load washing machine

Front Load Washing Machine

HYGIENE PRO

Hygiene Pro system sanitises the drum and keeps your laundry in a clean environment, saving time and making your life easy

HEXA CUBE DRUM

Unique cube-shaped drum prevents fabrics from getting trapped and damaged. Smaller outlet water holes on the drum create tiny flows to penetrate the fabric for better cleaning

BABY CARE

Specialty designed for baby clothes, it operates at 60°C to help remove bacteria

FEATURES

Auto Clean

It prevents the growth of bacteria inside, and avoids secondary pollution as well

Tub Clean

Enables cleaning of the machine itself with water at 90°C to sterilize the tub ensuring that there are no residues or molds, thereby maintaining hygiene

Intensive Wash

The Intensive Wash Program gets rid of tough stains while keeping the quality of the fabric intact

Hot Air Dry

Hot air is used to dry the washed clothes quickly. You can also set the dryness according to the fabric

Pause 'N' Add

You can add clothes in the machine that needs a quick wash

Brisk Wash

This course takes care of your everyday clothes, especially when you are running short of time, without hindering the wash quality

25% Less Time*

Speed Wash takes 25% less time to finish the laundry process by increasing the beat frequency and reducing the dwell time

Big Display

A large interactive display enables better selection and communication of the desired feature or programs

Front Load Washing Machine

NA-148MG4LN1(8KG) | NA-18MG1LN1(9KG)

FEATURES
